No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopy, recording, or any information storage and retrieval system, without permission in writing from the copyright owner.

The appearance of the code at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (27 Congress Street, Salem, Massachusetts 01970), for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Copy fees for pre-1993 articles are as shown on the article title pages; if no fee code appears on the title page, the copy fee is the same as for current articles.

Contents of Volume 63

NUMBER 1, OCTOBER 1993

SPECIAL REPORT

FRANK E. SPEIZER, Convener. Environmental Health Agenda for the 1990s: Summary of Workshop, October 1–6, 1991, Santa Fe, New Mexico 1

EXPERIMENTAL STUDY

ANDRÉS JARAMILLO AND GERALD SONNENFELD. Effect of Nickel Sulfide on Induction of Interleukin-1 and Phagocytic Activity 16

EPIDEMIOLOGY STUDY

JANE Q. KOENIG, TIMOTHY V. LARSON, QUENTIN S. HANLEY, VIVIANA REBOLLEDO, KAREN DUMLER, HARVEY CHECKOWAY, S.-Z. WANG, DANYU LIN, AND WILLIAM E. PIERSON. Pulmonary Function Changes in Children Associated with Fine Particulate Matter. 26

ENVIRONMENTAL EXPOSURE

LYNNE E. WAGENKNECHT, TERI A. MANOLIO, STEPHEN SIDNEY, GREGORY L. BURKE, AND NANCY J. HALEY. Environmental Tobacco Smoke Exposure as Determined by Cotinine in Black and White Young Adults: The CARDIA Study 39

SYMPOSIUM: FOURTH INTERNATIONAL SYMPOSIUM ON NEUROBEHAVIORAL METHODS AND EFFECTS IN OCCUPATIONAL AND ENVIRONMENTAL HEALTH

HIROSHI NAKAJIMA. An International Perspective in Neurobehavioral Toxicology. 47

YOSHIO MINO, TOSHIHIDE TSUDA, AKIRA BABAZONO, HIDEYASU AOYAMA, SIMPEI INOUE, HIROTOSHI SATO, AND HIROSH OHARA. Depressive States in Workers Using Computers 54

MAMORU HIRATA AND HIROSHI KOSAKA. Effects of Lead Exposure on Neurophysiological Parameters 60

TOSHIKO IKEDA, YOHKO KATAKURA, REIKO KISHI, AND HIROTSUGU MIYAKE. Acute Neurobehavioral Effects of Co-inhalation of Toluene and *n*-Hexane on Schedule-Controlled Behavior in Rats 70

JIAN HUANG, KANEFUSA KATO, EIJI SHIBATA, NOBUYUKI ASAEDA, AND YASUHIRO TAKEUCHI. Nerve-Specific Marker Proteins as Indicators of Organic Solvent Neurotoxicity 82

4 731H1 XL 1086
9/94 31249-150

KAZUTAKA KOGI. Workplace Strategies for the Control of Work-Related Risks 88

AGUSTIAH TRI-TUGASWATI. Review of Air Pollution and Its Health Impact in Indonesia 95

ANDERS IREGREN, MARIA TESARZ, AND EWA WIGAEUS-HJELM. Human Experimental MIBK Exposure: Effects on Heart Rate, Performance, and Symptoms 101

MIYAKO OMOTO, KUMIKO SEKI, TSUNEHIKO IMAI, AND RYOJI NOMURA. The Effects of Ethanol Exposure on Radial Arm Maze Learning and Behavior of Offspring Rats. 109

M. COLVIN, J. MYERS, V. NELL, D. REES, AND R. CRONJE. A Cross-Sectional Survey of Neurobehavioral Effects of Chronic Solvent Exposure on Workers in a Paint Manufacturing Plant 122

SHUNICHI ARAKI AND KATSUYUKI MURATA. Determination of Evoked Potentials in Occupational and Environmental Medicine: A Review 133

SATOKO EZOE, SHUNICHI ARAKI, YUTAKA ONO, NORITO KAWAKAMI, AND KATSUYUKI MURATA. Work Stress in Japanese Computer Engineers: Effects of Computer Work or Bioeducational Factors? . . 148

AKIHIRO IGATA. Epidemiological and Clinical Features of Minamata Disease 157

NUMBER 2, NOVEMBER 1993

HUMAN STUDY

JOHN D. OSTERLOH AND BEN J. FELDMAN. Urinary Protein Markers in Pesticide Applicators during a Chlorinated Hydrocarbon Exposure. 171

TOXICOLOGY STUDIES

ARTHUR MORGAN, CLARE G. COLLIER, KEITH J. MORRIS, AND KIRSTY A. LAUNDER. A Radioactive Tracer Technique to Determine *in Vivo* the Number of Fibers in the Lungs of Rats Following Their Administration by Intratracheal Instillation 182

GERALD L. VAUGHAN, SHARON A. TRENTLY, AND RONALD B. WILSON. Pulmonary Response, *in Vivo,* to Silicon Carbide Whiskers 191

L. J. SHYR, P. J. SABOURIN, M. A. MEDINSKY, L. S. BIRNBAUM, AND R. F. HENDERSON. Physiologically Based Modeling of 2-Butoxyethanol Disposition in Rats Following Different Routes of Exposure. 202

Symposium: Fourth International Symposium on Neurobehavioral Methods and Effects in Occupational and Environmental Health

Akinori Hisashige. Occupational Influences Relative to the Burnout Phenomenon among Japanese Nursery School Teachers 219

Megumi Nagano, Hideyuki Yamamoto, Koichi Harada, Eishichi Miyamoto, and Makoto Futatsuka. Comparative Study of Modification and Degradation of Neurofilament Proteins in Rats Subchronically Treated with Allyl Chloride, Acrylamide, or 2,5-Hexanedione 229

Yoshihide Kinjo, Hirofumi Higashi, Atsuhiro Nakano, Mineshi Sakamoto, and Ryoji Sakai. Profile of Subjective Complaints and Activities of Daily Living among Current Patients with Minamata Disease after 3 Decades 241

Maria G. Cassitto, D. Camerino, M. Imbriani, T. Contardi, L. Masera, and R. Gilioli. Carbon Disulfide and the Central Nervous System: A 15-Year Neurobehavioral Surveillance of an Exposed Population 252

Kiyofumi Saijoh, Tatsushige Fukunaga, Hironobu Katsuyama, Myeong Jin Lee, and Kimiaki Sumino. Effects of Methylmercury on Protein Kinase A and Protein Kinase C in the Mouse Brain . . 264

Ellen K. Silbergeld. Neurochemical Approaches to Developing Biochemical Markers of Neurotoxicity: Review of Current Status and Evaluation of Future Propects 274

Yasutaka Ogawa, Tetsurou Komatsu, Noboru Fujikake, Takaaki Fujii, and Junichi Tanaka. Neurotoxic Effects of 2,5-Hexanedione on Rapidly Growing Unmyelinated Peripheral Nerve Axons of a Rat Fetus: Dose–Effect Relationship 287

Mahmoud Amr, Mahmoud Allam, Abdel Lateef Osmaan, Mohamed El-Batanouni, Gamal El Samra, and Zakaria Halim. Neurobehavioral Changes among Workers in Some Chemical Industries in Egypt 295

Victor Nell, Jonathan Myers, Mark Colvin, and David Rees. Neuropsychological Assessment of Organic Solvent Effects in South Africa: Test Selection, Adaptation, Scoring, and Validation Issues 301

INSTRUCTIONS TO AUTHORS

Manuscripts. Environmental Research publishes original reports describing studies of the toxic effects of environmental agents in humans and animals. The principal aims of the journal are to define the etiology of environmentally induced illness, and to increase understanding of the mechanisms by which environmental agents cause disease.

The study of environmental health is inherently multidisciplinary. Therefore, the journal welcomes relevant articles in:

- epidemiology and risk analysis
- toxicology
- environmental and occupational medicine
- the neurosciences
- pathology
- pharmacology
- reproductive biology
- biochemistry
- molecular and cellular biology
- mineralogy

Reports which bridge one or more of these disciplines will be particularly encouraged, as will studies employing biological markers of toxic exposure and effect.

Occasional critical reviews and selected book reviews will be included.

Submission of Manuscripts. Three copies (an original and two copies) should be submitted to:

Environmental Research
Editorial Offices
Division of Environmental and Occupational Medicine
Department of Community Medicine
Mount Sinai School of Medicine
1 Gustave L. Levy Place, Box 1057
New York, NY 10029

The original and two copies must include photocopies of all tables and figures.

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been and will not be nor is presently submitted elsewhere, and that its submission for publication has been approved by all of the authors and by the institution where the work was carried out; further, that any person cited as a source of personal communications has approved such citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in *Environmental Research* represent the opinions of the author(s) and should not be construed to reflect the opinions of the Editor(s) and the Publisher.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

All papers will be published in English.

Form of Manuscript. Manuscripts should be typewritten (not mimeographed) with double or triple spacing and wide margins on high-quality bond paper. Subdivision of the article into *Abstract* (50–200 words), *Introduction, Materials and Methods, Results, Discussion, Conclusions, Acknowledgments, and References* is recommended. In addition, section headings are often useful.

Page 1 of the manuscript should contain the article title, author's name, and affiliation (include zip code where applicable). Page 2 should contain a proposed running head of fewer than 40 characters and the address of the person to whom proofs are to be sent. Number all pages consecutively beginning with the title page. Include five descriptive key words for computer-aided searching.

Abbreviations. Follow the usage established by *Chemical Abstracts.* If others are utilized define on first use.

Figures. Number all figures consecutively with Arabic numerals; legends should be typed together on a separate sheet. Lettering on the original figures should be large enough to take a reduction of 50–60 percent. Graphs should be plotted with black India ink on light blue coordinate paper, no larger than 8½ × 11 in. Grid lines that are to show in the photoreproduction should be inked in black. Photographs should be glossy prints (5 × 7 or 8 × 10 in.) with strong contrasts. X-rays should be right-reading glossy prints. Providing an overlay that indicates the most critical areas of halftones will aid in ensuring high-quality reproduction. Illustrations in color can be accepted only if the authors defray the cost.

Tables. Number all tables in order of appearance with Arabic numerals; type each table double-spaced on a separate page, including a short descriptive title typed double-spaced above the table. Footnotes to tables indicated by superscript lowercase letters, ^{a,b}, etc., should be typed double-spaced at the end of the table. Keep in mind the dimensions of the journal when planning the number of columns in a table.

Footnotes. Text footnotes should be avoided whenever possible.

References. These are to be cited in the text by the author's name and year of publication. References should be listed alphabetically in an unnumbered list at the end of the paper in the following style:

Coleman, D. C., Reid, C. P. P., and Cole, C. V. (1983). Biological strategies of nutrient cycling in soil systems. *In* "Advances in Ecological Research" (A. MacFayden and E. D. Ford, Eds.), Vol. 13, pp. 1–55. Academic Press, New York/London.

Rice, E. L. (1984). "Allelopathy," 2nd ed. Academic Press, New York.

Takács, S., and Tatár, A. (1987). Trace elements in the environment and in human organs. I. Methods and results. *Environ. Res.* **42**, 312–320.

The names of journals should be abbreviated according to *Index Medicus,* 1980, or *Chemical Abstracts Service Source Index,* 1985. Include in the reference list articles that are "in press," but "manuscript in preparation," "personal communication," and "unpublished observation" are to be avoided.

Reprints. A reprint order form will accompany the proofs. The corresponding author receives 50 reprints free of charge, and additional copies may be ordered.

Correspondence. Editorial correspondence concerning the manuscript should be addressed to:

Environmental Research
Editorial Offices
Division of Environmental and Occupational Medicine
Department of Community Medicine
Mount Sinai School of Medicine
1 Gustave L. Levy Place, Box 1057
New York, NY 10029

Correspondence concerning manuscripts in production and proofs should be addressed to:

Environmental Research
Production Department
Academic Press, Inc.
Journal Division
525 B Street, Suite 1900
San Diego, CA 92101-4495

Correspondence and information concerning subscriptions should be addressed to:

Academic Press, Inc.
Journal Subscription Department
6277 Sea Harbor Drive
Orlando, FL 32887-4900

Personal Computer Disks. Manuscripts may be submitted to *Environmental Research* on personal computer disks after the manuscript has been accepted and after all revisions have been incorporated onto the disk. Label the disk with the type of computer used, the type of software and the version number, and the disk format. All tabular material will be typeset conventionally. Art must be prepared as camera-ready copy; see the section on Figures earlier in this information for authors.

A hard copy printout of the manuscript that exactly matches the disk file must be supplied. Academic Press will not accept disks without accompanying printouts of all files on the disk. File names must clearly indicate the content of each file. The manuscript will be edited according to the style of the journal, and the proofs must be read carefully by the author. Disks that are not translatable or economical to process will not be used. The publisher reserves the right not to use the disk.

For further information on preparing disks for typesetting conversion, please contact the publisher (Editorial Supervisor, Journal Division, Academic Press, Inc., 525 B Street, Suite 1900, San Diego, California 92101-4495; telephone: (619) 699-6415; fax: (619) 699-6800).
